PROJECTS

AI Yoga Pose Detection 🚀* | Python, Flask, React(Vite), Tailwind CSS, OpenCV, MediaPipe

- Developed a full-stack AI-powered web application for real-time yoga pose detection and posture correction using computer vision techniques.
- Implemented pose estimation using MediaPipe and OpenCV to accurately detect and classify multiple yoga poses with high precision.
- Engineered a Flask-based backend to process live video streams and deliver low-latency feedback for real-time user guidance.
- Built a responsive and interactive frontend using React (Vite) and Tailwind CSS, ensuring seamless user experience across devices.
- Integrated real-time camera-based tracking with corrective feedback mechanisms to improve posture accuracy and user engagement.
- Designed a modular and scalable architecture following clean coding practices for maintainability and extensibility.

Tourly - Travel Website 🚀* | HTML, CSS, JavaScript

Sep 2024

- Built a fully responsive travel website with modern UI/UX design.
- Implemented interactive image sliders and dynamic components using JavaScript.
- Designed customizable tour packages and booking system for enhanced user experience.
- Optimized performance across mobile, tablet, and desktop devices.

ACHIEVEMENTS & ACTIVITIES

- Secured **1st position** in SpaceVITa Ideathon organized by VIT Bhopal.
- Participated in Cyber Safety Hackathon organized by MP Police.
- Gold certificate holder in NPTEL certification examination.

CERTIFICATIONS

- Google IT Support Certificate - Google
- Introduction to Internet of things - NPTEL
- Fundamentals of AI and ML - Vityarthi
- The Bits and Bytes of Computer Networking- Coursera
